

# Plant trees faster, easier and cheaper

## BIGHORN HIGH PRESSURE HYDRO AUGER

Dig tree planting holes, water and fertilise in just mins.

Bore tree stake holes in just seconds, with no need for a post driver.

Save on machinery, fuel and labour costs.

Our new Bighorn high pressure Hydro Auger takes the back-breaking effort out of digging tree holes. Instead, a high pressure water jet digs a typical root-ball size hole in just minutes – enabling you to plant more trees per day and finish projects faster. This goes even for the hardest soil types.

### Good for tree stakes too!

Attach the special lance and bore narrow holes for tree stakes in seconds. The resultant hole is deeper than you typically achieve with a post driver, ensuring sturdy long-lasting support for the tree during its first years of life.

### EASY TO MOUNT

Easily mount the Bighorn high-pressure Hydro Auger to the back of a tray-top ute, 4WD, small truck or trailer.

### EXTREME POWER

The unit features a 13HP Honda GX390 engine with electric start, mated to a 3,650 psi Italian made brass head pump for long service life. The high-pressure 900mm stainless steel lance and rotating nozzle ensures maximum power.

### BUILT TO LAST

The unit is built tough for our rugged Australian conditions with nation-wide support and rapid parts dispatch.
