

# BioGuard

## Revegetation

Mallee BioGuard is made from a 100% Biodegradable board. The guard offers protection to plants and saplings during the 1st year of life and are recommend for drier or sheltered sites.

They will naturally biodegrade in home compost into CO<sub>2</sub>, water and biomass within approximately 24 weeks.

### Important

BioGuard tree guards may break down quickly in very high rainfall events and exposed sites with adverse weather conditions. For these sites we recommend a fluted guard or (for a biodegradable option) a GreenGuard which we also stock in various sizes.

- / Made from 100% Biodegradable stock; certified to TUV home compostability standards in Europe
- / Cost effective for large scale projects
- / Fast to install; the tube-guard version requiring only a single rectangular stake in low wind areas
- / White interior helps promote plant growth
- / Offers some protection from spray drift
- / Degrades over time on-site reducing removal costs

### Product codes

- / BioGuard 2L Carton, Box of 250  
**PLMC2BIO-250**
- / BioGuard Tube Guard, Pack of 150  
435mm high x 160mm in dia.  
(provided flat-packed)  
**PLMBIOG435**
- / note: hardwood stakes / bamboo canes sold separately
- / see webstore for full details
