

The better way to grow

Mallee Elemental™ 65 Tree Guard

Made from 65% less plastic than traditional fluted tree guards, and without the performance compromises of other sustainable tree guards, the new Mallee Elemental™ range of tree guards are the better way to grow.

Grow better than before, in every way

Available exclusively from Arborgreen, the Mallee Elemental™ tree guard is made from UNiCOR, an innovative new fluted product which addresses many of the shortfalls of traditional products and sustainable alternatives.

The Mallee Elemental™ 65 tree guard is:

Made from a mixture of 65% stone (primarily Calcium carbonate) and 35% High Density Polyethylene (HDPE), reducing plastic content by 65%.

Trialed, tested and proven to perform as well as traditional plastic tree guards, offering protection that outlasts biodegradable alternatives.

Entirely recyclable through a national network of depots, 100% of the Mallee Elemental™ tree guard can be made into new products, reducing the need for raw materials, energy use, and emissions.

Available in 450mm x 200mm, with additional sizes in development. The colour of the tree guard has been carefully selected to maximise photosynthesis.

Unicor requires 92% less energy to recycle than conventional cardboard recycling, and in total the recycling process produces 80% less CO2 emissions when compared to conventional materials.

Waterproof, without degradation and with excellent thermal capability. UV stabilised and pest resistant, for lasting protection.

The right products for your project

Arborgreen is committed to helping Australia grow, by providing the best tools for better environments; if a solution exists, we'll find it. If it doesn't, we'll make one. We are Arborgreen, we grow together, to plant the future, together.
